

# MOUNTING CABINETS

For AA and DD fans

Overall:

Aluminum profile cabinets are used by us as soundproofing cabinets and air-conditioning units, general and for specific purposes.

The profile will cut to size and, after which it is put together with specially crafted plastic corners.

Plating:

The plating can be delivered in many designs, non-insulated and insulated.

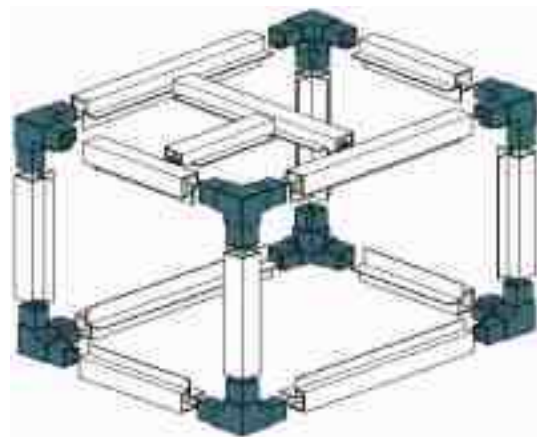

- Aluminum
- Galvanized
- Zincor and painted in all RAL colors
- Stainless Steel 304 or stainless steel 316
- Skinplate

Execution:

When installing a heavy fan we place a steel frame under which the aluminum is placed, depending on application:

- Blow- / Suction nozzles to be chosen by the customer
- Possibly Silenced inlet grilles for cooling motors
- Rain hoods For outdoor installation
- Doors
- Filter Sections
- Cool Sections
- Heating section
